FIT-OUT & CONSTRUCTION / LONDON & PROJECT SITES

Base Build Services

200+ Project sites supported over the relationship

Servis officers at Lidl, illustrating the wider Servis team.

Consistent security. Across changing projects.

A long-standing security partnership supporting fit-out projects, changing site conditions and demanding delivery programmes.

01 The requirement

Fit-out projects bring changing access arrangements, contractor movements and delivery schedules. Base Build Services needed responsive security that could adapt from mobilisation through to handover.

02 Our response

Servis provides SIA-licensed officers for access control, induction checks, delivery records and visible patrols. Officers record and escalate incidents and coordinate with site managers as the programme changes. The relationship has included short-notice deployment within hours of requests.

03 The value

More than five years of collaboration and over 200 project sites supported, including fit-out projects for major retail brands. This is a cumulative project figure, rather than a count of current Servis sites.
