FOOD MANUFACTURING / HARLOW, ESSEX

Wright's Mill

SINCE 2022 Security partnership

Wright's Mill, Harlow. Image supplied with the client case study.

Security that understands the operation.

Supporting the mill's people, production and daily movement of vehicles, with a security team integrated into site operations.

01 The requirement

A busy flour mill needs controlled access without interrupting the flow of HGVs, deliveries and production. G.R. Wright & Sons required a security team able to work closely with the wider operation.

02 Our response

Servis officers manage the gatehouse and weighbridge, coordinate vehicle movements and support agreed laboratory tasks. Out of hours, the team provides first-line fire panel response under site procedures, supported by documentation, reporting and training.

03 The value

A relationship established in 2022, with officers working as an extension of the mill's team and a remit that reaches beyond the gatehouse.

> Their support at Wright's Mill goes far beyond securing our premises... The security team has genuinely become an extension of our own operations.
>
> Mark Robinson, Operations Director, G.R. Wright & Sons Ltd
